

PROFILE

As a Python Fullstack Developer, I bring extensive experience in developing dynamic websites and applications using Django. With strong skills in front-end development using JavaScript, Bootstrap, and a deep understanding of REST APIs, I am passionate about creating efficient and user-friendly web solutions. My background in freelancing has honed my ability to handle diverse projects and meet client requirements effectively.

PROJECTS

e-commerce website

Built a comprehensive e-commerce website for online shopping.

Job Portal

Developed a fully functional job portal website to facilitate job searching and hiring processes.
